YOU HAVEN'T BEEN FORGOTTEN

Good news: There's never been a better time to rethink your hepatitis C (Hep C). You may benefit from scientific advances that have made treatments shorter, more effective, and injection free—**Hep C can be cured.** Cure means the virus is not detected in the blood when measured 3 months after treatment is completed.

GET THE HEP C FACTS

Hep C is an infectious (contagious) liver disease that spreads through blood-to-blood contact with an infected person. Hep C symptoms may not appear for years, or even decades. Even though you may not feel sick, your Hep C may silently be doing harm.

HEP C AFFECTS OVER
3 MILLION PEOPLE IN THE U.S.

An estimated **10% of Veterans** have Hep C

#1

Chronic Hep C is the number one cause
of **liver cancer and liver transplants**

75%

Up to 75% with Hep C are **unaware that their
livers are slowly being damaged**

THERE'S NEVER BEEN A BETTER
TIME TO RETHINK HEP C
BECAUSE IT CAN BE CURED
