Subject: [First name], you've made an important decision.

HARVONI
ledipasvir/sofosbuvir
90 mg/400 mg tablets

You're on your way

You've taken an important first step

You've made the decision to treat your hepatitis C (Hep C) with HARVONI. Now, let [HARVONI Support Path](#)[®] help you get the support and information you may need. From insurance and financial matters to help getting you started on treatment, [HARVONI Support Path](#) is simply on your side.

Let us provide insurance support

[HARVONI Support Path](#) simplifies the treatment approval process by connecting you to a live specialist.

Your specialist can:

- **Research, verify, and explain your benefits.**
- **Explain the prior authorization process and work with your healthcare provider office** so they can submit on your behalf (a step that some insurance companies require before they decide if they are going to pay for your medicine).
- **Provide information about the appeals process**, if necessary (a prior authorization that is initially denied may be reconsidered upon appeal).

HARVONI is a prescription medicine used to treat chronic (lasting a long time) hepatitis C genotype 1 infection in adults. It is not known if HARVONI is safe and effective in children under 18 years of age.

Important Safety Information

What should I tell my healthcare provider before taking HARVONI?

- If you have: liver problems other than hepatitis C infection; severe kidney problems or are on dialysis; any other medical condition; or if you are pregnant or breastfeeding or plan to become pregnant or breastfeed. It is not known if HARVONI will harm your unborn baby or pass into your breast milk.
- If you take amiodarone (Cordarone[®], Nexterone[®], Pacerone[®]), rifampin (Rifadin[®], Rifamate[®], Rifater[®]), St. John's wort or a product that contains St. John's wort. Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements. HARVONI may affect the way other medicines work, and other medicines may affect how HARVONI works.

You should not take HARVONI if you also take other medicines that contain sofosbuvir (SOVALDI[®]).

What are the most common side effects of HARVONI?

Common side effects include tiredness and headache.
